

# UTHMAN ODUSANYA

Lagos, Nigeria | +234 915 159 4935 | odusanyauthman2019@gmail.com

Portfolio | GitHub | LinkedIn

## PROFESSIONAL SUMMARY

Highly proficient Frontend and Full-Stack Developer specializing in architecting scalable, production-ready web applications using React, TypeScript, Node.js, and Supabase. Expert in implementing secure authentication protocols (JWT), high-performance payment gateways (Flutterwave), and AI-integrated workflows. Proven track record of delivering 10+ end-to-end solutions for SMEs with a relentless focus on accessibility (A11y), mobile-first responsiveness, and optimized user experiences.

## TECHNICAL SKILLS

**Frontend:** React, TypeScript, JavaScript (ES6+), Tailwind CSS, Shadcn/UI, HTML5, CSS3, Vite, Figma

**Backend & Security:** Node.js, Supabase, PostgreSQL, RESTful APIs, JWT Authentication, Row Level Security (RLS), Supabase Edge Functions

**Tools & Deployment:** AWS, Vercel, Netlify, Render, Git, GitHub, Groq API (AI Integration), Geolocation APIs

## PROFESSIONAL EXPERIENCE

### YEHGS (UK) LIMITED

May 2026 – Present

Technical Web Administrator | Agbara, Nigeria

- Optimized product data management systems, ensuring seamless synchronization between warehouse inventory and digital storefronts via real-time automation.
- Orchestrate weekly technical stakeholder meetings, translating complex performance metrics into actionable business strategies for senior management.
- Developed structured technical reporting frameworks to monitor system health and resolve operational bottlenecks efficiently.

### FREELANCE FRONTEND DEVELOPER

November 2023 – Present

Full-Stack Project Lead

- Engineered and deployed 10+ robust web applications for SMEs, utilizing modern frontend architectures to drive engagement and performance.
- Integrated secure multi-currency payment workflows and automated notification systems, significantly reducing manual transaction overhead for clients.
- Architected accessible and high-performance user interfaces from high-fidelity Figma designs, ensuring strict adherence to WCAG accessibility standards.

## KEY PROJECTS

**SmartCrew Scheduler** | React, TypeScript, Supabase, Groq API, Shadcn/UI

- Developed an AI-driven workforce management engine capable of generating conflict-free schedules and monitoring real-time attendance using Supabase Realtime.

**Ramadan Ibadah Tracker** | React, Supabase Auth/DB, Geolocation & Prayer Times APIs

- Built a comprehensive mobile-first worship dashboard featuring real-time data visualization, personalized tracking, and geolocation-based service integrations.

**REEREE.NG E-Commerce** | React, TypeScript, Zustand, Node.js, Flutterwave

- Engineered a full-scale fashion storefront with persistent state management and serverless notification APIs, optimizing the end-to-end checkout experience.

**USSD Directory Africa** | React, Vite, Axios, Formspree, SEO Optimization

- Created an SEO-optimized lookup platform for African network codes with instant search functionality and mobile-ready user actions.

## EDUCATION & ACHIEVEMENTS

**2nd Place Winner:** Web Development Technical Competition (NYSC Iseyin Orientation Camp, Batch A 2025)

**Languages:** English (Full Professional Proficiency)
